PROFESSIONAL SUMMARY

Information Systems Engineer with a Master's in Computer Systems & Networking and hands-on experience administering Sage 100 and Sage FRP 1000 ERPs in an industrial environment. Combines systems administration and SQL Server expertise with full-stack development skills (MERN, React Native, Tailwind CSS), delivering enterprise ERP support and freelance client projects in parallel. Adept at bridging technical implementation with business needs across Finance, Commercial, and Operations teams.

PROFESSIONAL EXPERIENCE

Information Systems Engineer · DIAMGRAIN SPA

Dec 2024 – Present

- Provide first and second-line technical support for Sage 100 and Sage FRP 1000 ERP modules (Commercial Management, Accounting, Stock), assisting users on-site and remotely.
- Contribute to the ongoing migration from Sage FRP 1000 to Sage 100, ensuring data integrity, business continuity, and minimal disruption to financial and commercial operations.
- Administer and maintain Microsoft SQL Server databases supporting ERP systems, including backups, query optimization, and resolution of data inconsistencies.
- Train end users on ERP system usage and document procedures, configurations, and resolved incidents to build an internal knowledge base and reduce recurring tickets.
- Collaborate cross-functionally with Finance, Commercial, and Operations teams to map business flows, identify process gaps, and integrate ERP improvements aligned with company needs.

Frontend Developer Intern · KleerInfini

Jul 2025 – Oct 2025

- Developed responsive user interfaces using React.js for an import/export management platform.
- Integrated frontend components with a Django backend via REST APIs.
- Improved user experience through dynamic data rendering and optimized state management.

Freelance Web Developer · Fiverr

Dec 2024 – Present

- Deliver custom web development services for international clients: Shopify storefronts, MERN-stack applications, and responsive marketing sites.
- Manage end-to-end project lifecycle requirements gathering, scoping, development, testing, deployment, and post-launch support while balancing a full-time engineering role.
- Apply modern frontend tooling (React, Tailwind CSS, Redux) and backend integrations (Node.js, Express, REST APIs).

TECHNICAL SKILLS

Languages	JavaScript, Java, Python, C
Frontend	React, Redux, Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express.js, Java EE, Laravel (PHP), REST APIs
Mobile	React Native (Expo)
Databases	Microsoft SQL Server, MongoDB, Supabase, Firebase, MySQL
ERP Systems	Sage 100, Sage FRP 1000 (Commercial Management, Accounting, Stock)
Tools & DevOps	Git, GitHub, VS Code, Postman
Concepts	MERN Stack, MVC Architecture, Agile, Database Design, ERP Migration

PROJECTS

Liikid — B2B Marketplace Mobile App · [React Native](#) · [Supabase](#) · [Google OAuth](#)

Cross-platform marketplace enabling businesses to list, discover, and trade products. Built secure Google Sign-In, geolocation-based discovery, and in-app messaging on a Supabase backend handling real-time data and authentication.

Vcar — Vehicle Marketplace Mobile App · [React Native](#) · [Supabase](#) · [Google OAuth](#)

Mobile application for vehicle listings, browsing, and sales. Implemented Google OAuth authentication and core features for ad management, with Supabase handling database, real-time updates, and user accounts.
